

Probationer Felony Re-Arrest Rates Following Sentence to Probation

Division of Criminal Justice Services
Crimestat Report

Date Prepared: March 22, 2011

**Report Methodology
for
Probationer Felony Re-Arrest Rates Following Sentence to Probation**

Includes offenders convicted of felony and misdemeanor offenses who were sentenced to probation by a New York State court during the time period indicated. Interim supervision cases are excluded. Calendar year cohorts are followed for one, two and three year time periods. If a probationer has multiple arrests across arrest categories, they will be counted in more than one category (VFO, Drug, and Other). For example, if a probationer has both a VFO arrest and a drug arrest during the follow-up period, they will be counted in both the VFO and Drug categories. However, the **Total Percent Arrested** category **includes only one arrest per offender**.

Number Sentenced – Number of felony and misdemeanor offenders sentenced to probation during the reporting period.

Percent Arrested for VFO - Percent of probationers sentenced who were arrested for one or more violent felony offenses within the reporting period.

Percent Arrested for Drug Offense - Percent of probationers sentenced who were arrested for one or more felony drug offenses within the reporting period.

Percent Arrested for Other Offense - Percent of probationers sentenced who were arrested for one or more other felony offenses within the reporting period.

Total Percent Arrested – Percent of probationers who were arrested for *any* felony offense within the reporting period. **Only one arrest per offender is included in this percentage.** The percentages reported within each follow-up period for VFO, Drug and Other Arrests do not add up to the Total Percent Arrested because probationers with arrests in more than one category are counted only once in the total.

Any comparisons between probationer felony arrest rates among county probation departments should be done with caution. Arrest practices, sentencing practices, and the overall risk of the probation population can vary dramatically from county to county.

Probationer Felony Re-Arrest Following Sentence 10-Year Trends

These data provide information on the felony re-arrest rates of probationers sentenced in each county. The cohorts are constructed so that re-arrest rates of individuals sentenced in more recent years can be compared to re-arrest rates of individuals sentenced in prior years. Re-arrest rates of one county should not be compared to another county. The risk level of offenders sentenced to probation, as well as arrest, indictment, and sentencing practices can vary significantly from county to county.

Statewide

- Probationer felony re-arrest rates have declined steadily between 2000 and 2009, driven primarily by lower re-arrest rates reported in New York City. - Within two years of sentence to probation, 19.1% of the offenders sentenced to probation in 2008 ($n=39,260$) were arrested for a felony offense compared to 21.9% of the offenders sentenced during 2000.
- Within three years following sentence to probation, 24.6% of all offenders sentenced to probation in 2007 ($n=39,997$) were arrested for a felony offense, down from the 27.1% reported for offenders sentenced in 2000.
